ABOUT ME

Hello! My name is Dmitry, I am 33 years old. Born in Belarus. Live in Cyprus. I have been working in the industry 11 years. 3 last as a JavaScript developer.

My passion for programming began in 2018 as part of horizontal career development. In order to better understand programmers and more accurately set tasks for them, I signed up for a coding course. In the same year, I wrote my first service for semi-automatic generation of shortened links with UTM tags and I really liked it.

Now I'm looking for a developer job in Cyprus. I will be very glad to have the opportunity to communicate and collaborate.

EXPERIENCE

Aug 2022 — Present

Frontend Developer, IEK GROUP
Moscow

I am working on two projects at the company:

Product catalog for IEK company

A large web application based on Next.js, responsible for rendering the products catalog. The most highly loaded project among those that I have developed.

- More than 30,000 product cards;
- More than 25,000 unique users daily;
- Display information in 3 languages;
- 3 design themes;
- Used on 5 company websites.

I am responsible for the frontend on the project.

Product test results database

A service for conveniently saving, editing and viewing information and testing products for compliance with GOST and TU standards.

- Access to the application is only for authorized users;
- A complex form for creating a Test Sheet that creates entities in a cascade;
- Several forms of reports generated on the client side;
- Caching data to prevent loss of partially completed forms;
- Frontend: Next.js, Backend: directus, Additionally: Redux

I am responsible for backend and frontend on the project. Access to the project is limited, but I am ready to demonstrate its functionality and code in person.

Jan 2021 — Aug 2022

Frontend Developer, Типография Радуга
Moscow

- Developed an online store for souvenirs using React. Unfortunately the project is currently closed.
- Supported a website on WordPress. Performed the functions of backender, frontender and administrator.
- Development of landing pages for advertising campaigns
